EXPERIENCE

Mfinity Infotech

Jan. 2025 – Present

Game Developer

Ahmedabad, Gujarat

- Shipped 11 mobile titles to Google Play on Cocos Creator and Unity, reaching 1M+ combined downloads.
- Implemented gameplay systems, UI flows, animations, progression and save systems in TypeScript and C#.
- Built data-driven architectures using JSON configuration for dynamic level and content loading.
- Developed vehicle physics – movement, suspension, collision and terrain – for a shipped racer.
- Integrated IAP, ads SDKs, level unlocking and save data; optimised every title for low-end Android.

PROJECTS

Rail Gunner (Unity 6, C#, URP) [[Click here to play](#)]

- First-person rail shooter: a machine gun on a moving train, fending off vehicles and drones.
- Wrote seven URP shaders by hand: height fog and volumetric light shafts in one half-res raymarch.
- Built nine enemy archetypes on a wave director, every attack gated behind a completed telegraph.
- Destructible vehicles via editor-time Voronoi fracturing; streaming world on a 27-chunk window.

Snowfield – FPP Zombie Shooter (Unity 6, C#, URP) [[Click here to play](#)]

- First-person survival: a 600 RPM full-auto rifle and a pump shotgun with shell-by-shell reloading.
- Built weapon handling – spread, recoil and ADS – with the crosshair tracking the live spread value.
- Implemented NavMesh pathfinding, a wave spawner capped at 25 enemies, and an enemy minimap.
- Generated the whole scene in C# at runtime: terrain, weapons, enemies, UI, audio. No imported assets.

Cute Animal Car Racing Game (Cocos Creator) [[Google Play](#)]

- Physics-based 2D vehicle game in Cocos Creator and TypeScript, inspired by Hill Climb Racing.
- Implemented movement, acceleration, braking, suspension, collision detection and terrain interaction.
- Integrated IAP, ads, save data management and level unlocking to support monetization.

EDUCATION

Ahmedabad Institute Of Technology

July. 2021 – May 2025

Bachelor of Technology in Computer Science

Ahmedabad, Gujarat

- **Coursework:** Data Structures, Algorithms, Database Management Systems, Computer Systems
- **CGPA:** 7.5/10

SKILLS

Engines : Unity 6 (URP, NavMesh, Cinemachine, Input System), Cocos Creator

Languages : C#, TypeScript, JavaScript, HLSL/ShaderLab

Graphics & Gameplay : URP shader authoring, Volumetric lighting, Procedural generation, FPS weapon handling, Enemy AI, 2D vehicle physics

Tools & Services : Git, GitHub, Jira, Android Studio, Spine, WebGL builds, Ads SDK & IAP Integration
