EXPERIENCE

Mfinity Infotech

Jan. 2025 – Present

Game Developer

Ahmedabad, Gujarat

- Developed and shipped multiple mobile games using Cocos Creator and Unity for Android platforms.
- Designed and implemented gameplay systems, UI flows, animations, progression mechanics, and save systems using TypeScript and C#.
- Built data-driven game architectures using JSON-based configurations for dynamic level loading and content management.
- Worked with Spine animations, particle systems, tween animations, materials, textures, and shader effects to enhance visual quality.
- Developed physics-based gameplay mechanics including vehicle movement, collision handling, suspension systems, and terrain generations and interactions for a Hill Climb Racing-style game prototype.

PROJECTS

Tricky Puzzle: Antistress Game (Unity)

- Developed puzzle gameplay systems and interactive mechanics using Unity.
- Implemented UI systems, game logic, and performance optimizations.

Cute Animal Car Racing Game (Cocos Creator)

- Developed a physics-based 2D vehicle game inspired by Hill Climb Racing using Cocos Creator and TypeScript
- Implemented vehicle movement, acceleration, braking, suspension behaviour, collision detection, and terrain interaction systems.
- Worked with physics materials, rigid bodies, colliders, and textures to create realistic vehicle handling mechanics.
- Designed procedural terrain interactions and optimized gameplay performance for smooth physics simulation.
- Utilized particle effects, animations, and camera-follow systems to enhance player experience.
- Integrated In-App Purchases (IAPs), save data management, level unlocking mechanisms and advertisement systems to support game monetization.

Emoji Connect Puzzle Game (Cocos Creator) (Personal Project)

- Developed a puzzle game where players connect matching emoji pairs through valid paths while avoiding invalid connections.
- Implemented path validation algorithms, matching logic, level progression systems, and game state management.
- Designed a dynamic hint system that identifies unsolved paths and provides context-aware assistance to players.

EDUCATION

Ahmedabad Institute Of Technology

July. 2021 – May 2025

Bachelor of Technology in Computer Science

Ahmedabad, Gujarat

- **Coursework:** Data Structures, Algorithms, Database Management Systems, Computer Systems
- **CGPA:** 7.5/10

SKILLS

Languages : C#, JavaScript, Typescript, HTML/CSS

Tools & Services : Git, Jira, Android Studio, GitHub, Spine, Ads SDK Integration
